YOY: year-on-year growth rate, as compared to the same period of last year.

Brief Description:

1. The average daily traffic volume and toll revenue of the projects in this month recorded a significant increase as compared to the same period of last year, mainly benefited from the positive impact on operating performance of highways from the factors such as the sustained growth in the domestic economy.
2. Yanba C was commenced operation simultaneously with the connecting Huishen Coastal Expressway on 25 March 2010. The statistics in the line of “Yanba Expressway” in the table include the operational statistics of Yanba A, Yanba B and Yanba C.
3. The operational statistics of Nanguang Expressway recorded a substantial growth as compared to the same period of last year, since Nanguang Expressway is still in the initial operation stage as well as several sections of a municipal road parallel to Nanguang Expressway are being closed for expansion and reconstruction.
4. The completed section of Qinglian Expressway (Fengtouling-to-Lianzhou Section and Fengbu-to-Jingkou Section) has adopted expressway toll rates since 1 July 2009 and a toll-by-weight trial system for trucks since 1 November 2009. The statistics in the table exclude the operational statistics of Liannan Section which was still adopting Class 1 Highway toll rates and Qinglian Class 2 Road held by Qinglian Company. In June 2010, the overall average daily toll revenue of Qinglian Company was approximately RMB944,000. As the original toll model of Qinglian Project differs from the toll model of expressways in terms of the toll rate, vehicle category and statistical method, so that the year-on-year change of operational statistics of Qinglian Expressway is not provided.
5. Following the successive implementation of the governmental traffic plans, GZ W2 Expressway’s function as a cross border passage has become prominent, which had a positive impact on the operating performance of GZ W2 Expressway.
6. The highways which adopted “Green Passage Toll Free Policy” for fresh agricultural products carrier vehicles pursuant to the requirements of relevant government authorities include Jihe Expressway, Yangmao Expressway, Wuhuang Expressway, Nanjing Third Bridge and Qinglian Expressway.

For basic information and historical operational statistics of each of the toll highways, investors may visit the website of the Company at <http://www.sz-expressway.com> under the sections “Toll Roads & Bridges” and “Operational Statistics”, respectively.

CAUTION STATEMENT

The Board wishes to remind investors that the above operational statistics are based on the Group’s internal records which are unaudited. Differences may arise between such statistics and the data disclosed in periodic reports due to completion of certain steps on sorting out the traffic volume and toll revenue data and confirming the results of sorting out such data. Such statistics are provisional and for reference purposes only. Investors are cautioned not to rely unduly on such statistics.
