YOY: year-on-year growth rate, as compared to the same period of last year.

Brief Description:

1. In May 2009, the negative impact on operational performance of highways from the factors such as slowdowns in macro-economy growth still existed.
2. In the first half of 2008, the construction works of Shenyang Pathway 2 affected the revenue of Yanba Expressway to a certain extent. Shenyang Pathway 2 opened to traffic on 4 July 2008. It improved the road networks nearby. Nanguang Expressway opened to traffic at the end of January 2008, and the statistics of Nanguang Expressway for the same period of last year was on the low side. Therefore, the growth rate of Yanba Expressway and Nanguang Expressway were higher than the average level of other projects in Shenzhen area as compared to the same period of last year.
3. Pursuant to the requirements of relevant government authorities, the highways such as Jihe Expressway, Yangmao Expressway, Wuhuang Expressway and Nanjing Third Bridge continued to adopt “Green Passage Toll Free Policy” for carrier vehicles legally carrying fresh agricultural products in succession.
4. Qinglian Project includes Qinglian Class 1 Highway and Qinglian Class 2 Road. Qinglian Class 1 Highway is in full operation this year, while it was under construction during the same period of 2008, and the statistics was not comparable.

For basic information and historical operational statistics of each of the toll highways, investors may visit the website of the Company at <http://www.sz-expressway.com> under the sections “Toll Roads & Bridges” and “Operational Statistics”, respectively.
