Brief Description:

1. As the reconstruction or construction of certain municipal roads and interchanges connecting highways and roads were completed consecutively and the second phase of Shenzhen Metro commenced operation, the transportation network in Shenzhen region has been under continuous improvement. In addition, tolls on certain local roads in Shenzhen were halted in succession. All these led to certain changes in traffic distribution and composition in the region's road network, and thus had positive or negative impacts on the operational performance of the projects operated or invested by the Group in Shenzhen region. Among these, changes in road network promoted the operational performance of Yanpai Expressway while Meiguan Expressway, Shuiguan Expressway, Shuiguan Extension and Nanguang Expressway were adversely affected.
2. An unified standardisation of the toll fees ("Unified Scheme") has been implemented on all the expressway projects in Guangdong province starting from midnight on 1 June 2012. It is expected that there will be certain impact on the operational performance of some sections of the Group. For details of the Unified Scheme, please refer to the announcement of the Company dated 31 May 2012.

For basic information and historical operational statistics of each toll highways, investors may visit the Company's website at <http://www.sz-expressway.com> under the sections "Toll Roads & Bridges" and "Operational Statistics", respectively.

CAUTION STATEMENT

The Board hereby reminds investors that the above operational statistics are based on the Group's internal records which are unaudited. Differences may arise between such statistics and the data disclosed in periodic reports due to completion of certain steps on sorting out the traffic volume and toll revenue data and confirming the results of sorting out such data. Such statistics are provisional and for reference purposes only. Investors are cautioned not to rely unduly on such statistics.
