YOY: year-on-year growth rate, as compared to the same period of last year.

**Notes:**

Based on past records, due to the difference in location and function, the Spring Festival holiday may have a positive or negative impact on the operational performance of the Group's highways. For example, during the holiday period, the traffic volume and toll revenue of the interprovincial channel highways such as Qinglian Expressway , Yangmao Expressway and Guangwu Project are usually at higher levels, while the operational statistics of the highways in the urban peripheral area such as the sections in Shenzhen region usually indicate a trend of lower levels. As the time of Spring Festival holiday differs for each year (2019 Spring Festival: 5 February; 2018 Spring Festival: 15 February), investors are advised to consolidate the operational statistics for both January and February of each year for comparison in order to see the trend of the year-on-year change in operational performance of the projects.

For basic information and historical operational statistics of each toll highway, investors may visit the Company's website at <http://www.sz-expressway.com> under the sections of "Toll Roads & Bridges" and "Operational Statistics", respectively.

**CAUTION STATEMENT**

The Board hereby reminds investors that the above operational statistics are based on the Group's internal records which are unaudited. Differences may arise between such statistics and the data to be disclosed in periodic reports due to completion of certain steps on sorting out the traffic volume and toll revenue data and confirming the results of sorting out such data, as well as operational statistics of certain projects being recorded on the basis of estimation at the date of monthly settlement and disclosure under the circumstance of inter-network toll collection. In addition, The Company adjusts monthly forecast statistics in accordance with the difference between the estimated statistics and the actual settlement statistics for the previous month, resulting in a certain degree of YOY deviation. So, operational statistics in the announcement are only for investors' reference as phasic statistics, investors are advised to use such statistics cautiously.
